

## COMP 4350 Project Iteration 3

### Group B (Doctor-Client Portal)

#### **Implementation and deployment:** (6/8)

- Fully working Android native app for the features of all iterations so far (3/4)

Client edit does not work. Not all features are implemented. You are supposed to implement all features in Android as well. (-1)

- End-to-end, fully working (back-end, front-end, DB, and AWS) features for the user stories planned for iteration 3. (3/4)

Not all of your features uses REST API. (-1)

**Note: By the end of the next iteration you have to implement all features for both web and android.**

#### **Testing:** (7/8)

- Android JUnit testing (1.5/2)

Not enough Unit Test. (-0.5). Write more test for API calls.

- Robotium test (at least one per user story) (1.5/2)

Test suite does not cover all big user stories. You have to implement at least one Robotium test for each big user story. (-0.5)

- Back-end unit tests for the new and old classes (1/1)
- Front-end unit tests for the new and old classes (e.g., using Jasmin) (1/1)
- At least one integration test per detailed story (1/1)
- Selenium. at least one automated end-to-end test per user story. (1/1)

#### **Design and documentation:** (6/6)

- Good programming practices (1/1)
- Proper design patterns (2/2)
- Normal level of refactoring in the code-base toward a better design, in every iteration. (1/1)
- Proper Android code-base (1/1)

- a RESTful service (or any alternative) **(1/1)**
- A missing API documentation (or missing info such as the location of the service and how to use it). **(0/-1)**
- A missing installation guide for anything that is not in the documentation, like any special setting if required. **(0/-1)**

**Process and planning:**

**(3/3)**

- Team's communication and members' contributions **(2/2)**
- Following the plan **(1/1)**

**Total**

**(22/25)**
