ITERATION 4 USER STORIES

Cleaned up Web and Completed android features.

Bonus mark :)

Got jenkins working.

Android setup

Git url: <https://github.com/joshsimard/COMP4350-Android.git>

Selenium (Front End Test)

To run the Selenium Test:

- Download and install Chrome browser if you do not already have it
-> <https://www.google.com/chrome/browser/desktop/>
- Download Chromedriver
-> <http://chromedriver.storage.googleapis.com/index.html?path=2.21/>
- Run the Chrome driver
- Enter the url
-> <http://localhost:8000/tests> (This will test the website on AWS)

Integration and Unit Tests

How to run Test:

- CD into the project main directory.
- Seed the database (creates 2 default users) by using the command: `php artisan migrate:refresh --seed`
 - NOTE: You must do this every time you want to run the tests (currently).
- Now run the tests with the command: `vendor/bin/phpunit`

N/B: Implemented Restful API and documentation is included in the iteration 2 document folder.

COMP 4350 - Minutes

Iteration: 4
