COMP 4350 Project Iteration 2

Group B ([Doctor Client Portal](#))

Implementation and deployment: **(4.5/7)**
- End-to-end, fully working (back-end, front-end, DB, and AWS) features for the user stories planned for iteration 2. **(1.5/4)**

  You created service but you didn't consume it from the web application. You are just directly using the back-end. You must consume that service from your web site. Other it won't be a SOA. (-2)
  Though a client can set appointment, but there is no information about the doctor. Client doesn't know who he is setting appointment with. Client should be able to know about the doctor.
  Client is unable to see his previous appointments.
  Doctor cannot see his appointments. It looks empty, even though client already set some.
  "Doctor can see and can update appointment" – doesn't work
  (-0.5)

- Correctly deployed service on AWS **(3)**

Testing: **(10/10)**
- Back-end unit tests for the new and old classes **(2/2)**

- Front-end unit tests (e.g., using Jasmin) **(3/-3)**

- At least one integration test per detailed story **(2/2)**

- Selenium. at least one automated end-to-end test per user story. **(3/3)**

Design and documentation: **(4/5)**
- Good programming practices **(1/1)**

- Proper design patterns **(1.5/2)**

Still some of your business logics are in the controller classes. (-0.5)

- Normal level of refactoring in the code-base toward a better design, in every iteration. **(0.5/1)**

You implemented all of business logics in one single class. Use different class for client management, appointments, etc. (-0.5)

- a RESTful service (or any alterative) **(1/1)**
Handle all exceptions. Return proper response code based on the situation. E.g., if a

client (or anything) of specific ID is not found in the server return standard HTTP response code 404-Not Found.

- A missing API documentation (or missing info such as the location of the service and how to use it). **(0/-1)**
- A missing installation guide for anything that is not in the documentation, like any special setting if required. **(0/-1)**

Process and planning: **(2.5/3)**

- Team's communication and members' contributions **(2/2)**

Couple of members are contributing very less compared to other three members.

- Following the plan **(0.5/1)**

Three big user stories are mentioned for Iteration-3 but no detail user stories for any of those are mentioned. (-0.5)

Total **(21/25)**
